

## Computing

EYFS		
<b>ELG- Personal, Social and Emotional Development</b>	<b>Managing Self</b>	Children at the expected level of development will: <ul style="list-style-type: none"> <li>Be confident to try new activities and show independence, resilience and perseverance in the face of challenge.</li> <li>Explain the reasons for rules, know right from wrong and try to behave accordingly.</li> </ul>
<b>ELG – Expressive Arts and Design</b>	<b>Creating with Materials</b>	Children at the expected level of development will: <ul style="list-style-type: none"> <li>Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function</li> </ul>

PROGRAMMING / CODING						
Year	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
NC Aims	<ul style="list-style-type: none"> <li>Understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions.</li> <li>Use logical reasoning to predict the behaviour of simple programs.</li> </ul>		<ul style="list-style-type: none"> <li>Use sequence, selection, and repetition in programs; work with variables and various forms of input and output.</li> <li>Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs.</li> </ul>			
Skills	Follow a sequence of steps to solve a problem and create instructions that others can follow. Observe and explore outcomes when buttons are <b>pressed in sequences</b> on a robot and identify and debug a simple algorithm.	Plan and enter a sequence of instructions using a robot, specifying <b>distance and angle of turn</b> . Create a simple solution that tests <b>an idea</b> , predict the outcome and test that the intended solution works.	Plan and enter a sequence of instructions using a robot or other device to achieve <b>specific outcomes</b> . Use familiar computer hardware to successfully complete a task.	Describe and demonstrate a simple program that contains a <b>looping element</b> and how part of a program may need repetition. Use new and unfamiliar computing hardware.	Design simple sequences of instructions, <b>including IF, THEN and OTHERWISE</b> commands, to decide if something is true or false. Apply computing skills using unfamiliar hardware to solve a problem successfully.	Demonstrate how programs run in an <b>exact order</b> by following a sequence of instructions, and test and debug programs. Identify how using different hardware can increase creativity and productivity. Write a program to

					Use a range of sensors to control a physical system. (Rugged Robot)	control a physical system, which may include output devices, such as motors, lights and buzzers.
Knowledge	<p>An algorithm is a sequence of steps, instructions or rules that is used to perform a specific task.</p> <p>Algorithms can be followed by people or digital equipment. For algorithms to achieve the end goal, instructions have to be accurate and followed sequentially. Mistakes are called bugs and finding and fixing them is called debugging.</p>	<p>Computers' behaviour can be predicted and the outcome tested by following the steps of an algorithm and recognising that the computer will follow instructions precisely.</p> <p>Robots can be programmed to follow a series of instructions, using an algorithm.</p>	<p>Several pieces of hardware can be used together to complete one task, such as using a camera to take a photograph, uploading it to a computer and then printing it using a printer. Sequencing instructions is the step-by-step process that robots or other devices follow to achieve specific outcomes. This can be a single algorithm or series of algorithms called a program.</p>	<p>A loop is a sequence of instructions that repeats continually until a certain condition is met. A program that contains a looping element is useful for a wide range of scenarios, such as controlling traffic lights. Interacting regularly with hardware enables users to recognise common features and become confident in working with new or unfamiliar hardware.</p>	<p>Sequences of instructions (algorithms) that contain IF, THEN and OTHERWISE statements are called selections. The computer will complete operations based on whether the conditions of these selections are met or not. Using prior knowledge and experience of computing skills can be applied to unfamiliar hardware to solve a problem successfully.</p> <p>Sensors can be combined to control a physical system, such as using motion, light and sound sensors to control a road network of traffic lights and level crossings.</p>	<p>Decomposition is breaking down a problem down into smaller parts to make it easier to process and following a sequence of instructions.</p> <p>Decomposition is useful for checking programs and debugging because it saves time. Some hardware is more effective than others in particular contexts, such as using virtual reality or a touchscreen rather than a mouse to meet a specific need.</p> <p>Choosing the right hardware can increase creativity and productivity.</p>
	<b>Bright Lights, Big City.</b> (Follow provided)	<b>Dragons!</b> (Create algorithm for)	<b>Scrapheap Challenge</b> (Write a program for a	<b>Amazia</b>	<b>To Infinity &amp; Beyond</b> (Debug a code to make a	<b>May the Norse be with You!</b>

Topic	<p>program to get directions, write own directions and compare – use scratch jr)</p> <p><b>Paws and Claws</b> (Design an animal or dinosaur and program a bee bot to follow instructions)</p>	<p>chn using positional language. Note improvements too)</p>	<p>robot to move around a screen)</p>	<p><b>Epic Empires</b></p> <p><b>Incredible Industry</b></p> <p><b>All the fun of the Fair</b></p>	<p>model of how the planets move around one another using Scratch Hour of Code)</p> <p><b>Eureka</b></p> <p><b>Dragon Dynasty</b></p> <p><b>Circles of Life</b></p>	<p><b>Tiempo de Fiesta</b></p> <p><b>Peace in our Time?</b></p> <p><b>Survival of the Fittest</b></p>

Internet Safety						
Year	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
NC Links	<ul style="list-style-type: none"> <li>Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.</li> </ul>		<ul style="list-style-type: none"> <li>Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.</li> </ul>			
Skills	Recognise that some websites ask for private information and discuss how to handle these requests.	Use digital technology appropriately to communicate and connect with others locally and globally.	Use appropriate tools (software, websites and apps) to collaborate and communicate safely online. Describe simple rules for sharing images	Use digital technology in different ways in the classroom, home and community to achieve a set goal.	Discuss the impact that digital content can have and why it is important to discuss their use of technology with an adult.	Name some of the positives and negatives of communicating with others online.

	Talk as a class about communication over the internet and what is it useful for locally e.g. text/email.	Stay safe online by choosing websites that are appropriate to visit.	and data safely.  Explain the advantages and disadvantages of communicating electronically and strategies for preventing issues.	Identify the positive and negative influences of technology on health and the environment and how to protect themselves. Explain actions to report and prevent cyberbullying.  Explain that when searching online, some web pages may contain adverts or pop-ups that encourage people to click on them.	Demonstrate appropriate online behaviour and apply a range of strategies to protect themselves and others from potential online dangers, inappropriate behaviour and bullying.	Identify the benefits and risks of devices broadcasting the user's location and of giving personal information to different organisations.  Recognise that sending intimate images and content and using offensive language online is a risk and has a permanent online trail (digital footprint).
Knowledge	Private information includes name, address, date of birth or school and this information should not be shared online. Any concerns or worries should be reported to a trusted adult.	Digital technology, such as email, social media platforms or blogs, can be used by individuals to communicate and connect with others but should be used appropriately, including using language that is not hurtful or disrespectful to others, having adult supervision or following the school's acceptable use policy.  Some websites are not age-appropriate and so it is	Advantages of communicating electronically are that it is available at any time, instant and global. Disadvantages include easier misunderstandings, lack of privacy (once something is published online, it cannot be removed) and a threat to personal safety (access to personal information). Concerns should be reported to a trusted adult.	Cyberbullying is bullying using technology, such as social media or gaming networks.  Technology can have positive influences on health, such as enabling people to hear using a hearing aid or helping doctors to diagnose or treat illnesses using special machines. Negative influences on health include problems like eye strain and poor	Working online requires a level of responsibility and strategies to keep safe, including protecting private information and accounts. This enables people to protect themselves and others from potential online dangers, inappropriate behaviour and bullying.  Any concerns should	People online are not always who they say they are and may use intimate images or content inappropriately. Once something is online, it is not under the user's control and can be made public. Using offensive language can affect others negatively and is a form of bullying called 'trolling'.  The benefits of devices broadcasting

		<p>important to tell a trusted adult about any concerns or worries.</p>	<p>Images and data should not be shared online without the permission of the owner. Personal information, such as full name, age, school and address, should not be shared online.</p> <p>Different software, websites and apps can be used to collaborate and communicate online. Each one has different terms and conditions that need to be adhered to stay safe, such as age restrictions.</p>	<p>posture. Technology can have positive influences on the environment, such as using systems to monitor and control energy usage.</p> <p>Negative influences on the environment include contributing to pollution by travelling and using a lot of power.</p> <p>Digital technology can be used in different ways and settings to achieve a set goal, such as using data collection in the community and home to answer a classroom-based question.</p>	<p>be reported to a trusted adult, the police or child protection organisations.</p> <p>Digital content can affect others and be available to anyone. Digital content is traceable, which means it can be tracked to the person who created it. To keep safe, it is important to discuss technology use with a trusted adult.</p>	<p>the user's location and passing on personal information include improved customer service, allowing organisations to analyse data and improving the quality of applications. Risks include identity theft, cyberstalking, victimisation and threat to privacy.</p> <p>The positives of communicating online include the speed, low cost and ability to communicate globally. The negatives of communicating online include the threat to privacy, influencing of others, access to technology and anonymity.</p>
